BRECK'S STANDARD LAWN GRASS SEED

We supply Breck's Standard Lawn Grass Seed either in bulk or put up in 1-qt. cartons, 2, 4 and 8-qt. green bags.

We have given much thought and made many experiments in order to ascertain just what is the best mixture for permanent lawns, and the grasses which are best suited to this climate. By the proper blending of the varieties which constitute Breck's Lawn Grass, we have obtained a mixture that from early spring to late fall will give to lawns made with it that rich, deep green so often admired upon the lawns and parks of England, but so seldom seen in this country. Sow at the rate of four bushel per acre.

Per bush. of 20 lbs., \$4.00; 10 bushels, per bush., \$3.75.

BOSTON PARK LAWN GRASS

The same mixture as supplied by us to the City of Boston Park Commissioners, for sowing on the parks administered by them. Sow at the rate of sixty-four lbs. per acre.

Per lb., 25 cents. Per bushel of 32 lbs., \$7.00.

BRECK'S "SHADY SPOT" LAWN GRASS

This is a mixture of grasses that is naturally adapted for growing under trees and in places where the sun has not ready access. Per bushel, \$4.00.

BRECK'S BANK AND TERRACE GRASS MIXTURE

A mixture of deep-rooting grasses specially prepared for embankments and situations where it is impractical to get a successful catch of the less-spreading rooted sorts. Per bushel, \$4.00.
